Attaching the DKV Motor Drive

1. Locate the Cam-Key Lever & Screw Assy, and remove by unloosening the Phillips Head Screw. (fig.1)
2. Locate the Motor mounting stud. (fig.2)
3. Attach RA Drive Motor to Mounting Stud. (fig.2)
4. Engage RA Drive Motor Gear with Large Gear on Mount, and tighten Lock Knob. (fig.3)
5. Attach the cord from the Hand Box that has the 8-Pin Connector into the RA Motor Drive. (fig.4)
6. Place 4 D-Cell 1.5v Batteries into the Battery Pack and attach DC power cord to Hand Box. (fig.4)
7. Turn the ON/OFF Switch to ON. Note: The switch must be turned UP for the Northern Hemisphere.

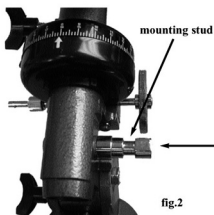

fig.2

Motor Speeds

- * The top two buttons on the Hand Box move the telescope two times the regular speed.
- * The bottom two buttons on the Hand Box move the telescope four times the regular speed.

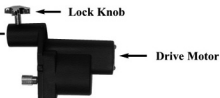

fig.1

This Cam-Key Lever and Screw Assembly must be removed in order for the motor drive to function properly
